facilities, and restrooms. The structure will be of cement block construction and will be located on the Northwest inside corner of the two acre plot, which now houses the facilities of the Stanton Little League.

"Our concern in setting up this clubhouse is to provide a meetingplace and home for boys and girls groups in the Stanton and West Anaheim area", Pebley explained. "While the building is dedicated as a youth center, first priority for its use will go to the service organizations working with the younger boys and girls." The completed facility will be administered by a community committee of representatives from organizations using the building.

The two acre plot of ground on which the clubhouse is being constructed is located East of the intersection of Knott and Cerritos Avenues on the latter avenue. It was donated to the Stanton Lions club some years ago by one of their members, Al Stock, who expressed the hope that it would be developed to serve the needs of the young boys and girls of the community.
